

MINDER AI • FOR TECHNOLOGY AND DATA LEADERS

Your stack sees the plan. Minder sees the plant.

The operational layer that records what your systems never do, and the world model it trains.

LONDON, UNITED KINGDOM

THE GAP

Every system is right. The plant is still late.

ERP

orders and costs

MES

work orders

SCADA

tag values

CMMS

assets and jobs

QMS

defects and holds

Historian

time series

BETWEEN THEM · NEVER RECORDED

Who decided what, why, and what happened next. The handovers, workarounds and unwritten rules that actually run the plant.

THE BLIND SPOT

Model the system and you model the plan.

MRP ALLOCATION

100 hours across 10 operators.

OBSERVED ON THE FLOOR

One operator carries 60 hours. Five wait.

The value sits in the data **no system records.**

THE RECORD · EXAMPLE: INDUSTRIAL DRYER

The record your stack was never built to hold.

01 · CONTEXT

Dryer 4, heavy cotton load

02 · STATE

Outlet temperature and ambient humidity

03 · ACTION

Operator extends the cycle

04 · NEXT STATE

Residual moisture measured

05 · OUTCOME

No rewash. Energy logged.

06 · WHY

Humid day, heavy towels

Product, machine, environment and human judgement, linked in time. Every site adds more.

CAPTURE

Four ways in. Nothing ripped out.

PEOPLE

Voice in their own language, on phones and wearables they already use.

MACHINES

Retrofit sensors for energy, heat and vibration. PLC signals read only.

SYSTEMS

Reads ERP, MES, CMMS and historians. Writes back only through approved adapters.

ROBOTS · IN RESEARCH

Demonstration-trained arms on off-the-shelf hardware.

ARCHITECTURE

Four layers. One operational truth.

DEPLOYMENT

Live in six weeks. Your stack stays.

WHAT WE NEED

- ✓ Read access to ERP and MES
- ✓ A network segment for edge devices
- ✓ One line and a named owner

WHAT YOU WON'T NEED

- A migration
- New devices for operators
- Writes to your control systems

WEEKS 1–2

Map the line

WEEKS 3–4

Connect

WEEKS 5–6

Live

SECURITY AND SOVEREIGNTY

Your data, your region, your rules.

Owned, hosted and governed in Europe, for a Sovereign Industrial Europe  

OWNERSHIP

You own your raw data. Always.

RESIDENCY

UK in London, EU in EU regions. Edge mode keeps plant data on site.

MODELS

Model agnostic. In-region inference. Open-weight option on premises.

GOVERNANCE

Evidence, recommendation, approval and action, traced end to end.

PEOPLE

No individual worker scoring. GDPR and works council ready.

ASSURANCE

ISO 27001 by June 2027 · SOC 2 by August 2027 · IEC 62443-aligned OT

IN PRODUCTION · KASA LAUNDRY, VIETNAM

Running on a real plant floor today.

6 wks

to go live

departments on one event log

THE MINDER WORLD MODEL

LLMs learn language. Robots learn motion.
Minder learns consequence.

	LANGUAGE MODELS	ROBOTICS MODELS	MINDER WORLD MODEL
LEARNS FROM	Text	Demonstrations	Decisions and outcomes
ANSWERS	What does this say?	How do I do this task?	What happens if we do this?
SEES	Documents	One task, one robot	The whole operation

HOW IT WORKS

Ask what happens next, before you act.

✓ Compares options

✓ Shows its confidence

✓ Abstains when unsure

THE FLEET EFFECT

Every site makes the model better.

It works like a vehicle fleet training one driving model. Each site improves the shared model, and the model is tuned back to your plant.

RAW DATA NEVER LEAVES YOUR CONTROL

ROADMAP

Autonomy is earned, one stage at a time.

NOW

Understand

Live operation connected.
Conflicts surfaced. Decisions supported.

LIVE

NEXT

Compare

v0 predicts consequences for one asset class, tested across sites.

LATER

Supervised action

Acts only through validated adapters, approvals and safety controls.

HORIZON

Embodiment

Machines and robots, once capability is proven.

TWO WAYS IN

Pilot the platform. Or help build the model.

01 · APPLICATIONS PILOT

One line, live in six weeks.

- ✓ Architecture review in week one
- ✓ Read-only integration by default
- ✓ Paid against proven value

[BOOK AN ARCHITECTURE SESSION →](#)

02 · WORLD MODEL FOUNDING PARTNER

A technical seat on the programme.

- ✓ First access to v0 and its evaluations
- ✓ Benchmarks on your own KPIs
- ✓ Founding discount, locked in

[RESERVE A FOUNDING PLACE →](#)

NEXT STEP

Give us one line.
We'll show you the
plant behind the
plan.
